

iluminAI

BRAND BOOK

Rare Disease Intelligence

No breakthrough starts from zero.

Visual and verbal identity system · Version 4.0 · October 2026

A knowledge network that makes the invisible visible.

IluminAI connects genetic and phenotypic signals with rare diseases, publications, studies, and communities in a living map. AI reveals relationships and helps build on prior advances, even when a disease has another name.

PURPOSE

Make rare disease diagnosis 10× more efficient by connecting evidence that is fragmented today.

Evidence → connection → direction

A global social-impact project. Essential access is free for patients and families.

The meaning behind the name.

ILUMINA

AI

Illuminating relationships that are hard to see

Guiding idea

No breakthrough starts from zero.

CONNECTS

Turns isolated entities into a readable network.

GUIDES

Helps people frame better questions and pathways.

BRIDGES

Brings evidence and communities closer together.

Illuminated DNA connects evidence and possibility.

1

Double helix

Genotype + phenotype, connected.

iluminAI

2

Illuminated node

Discovery, signal, hope.

Symbol

Use it when the brand is already recognizable: favicon, avatar, seal, or icon.

A clear identity on light and dark backgrounds.

PRIMARY VERSION · LIGHT BACKGROUND

REVERSED VERSION · DARK BACKGROUND

Always use the transparent-background file on uniform surfaces. Avoid highly detailed photography behind the logo.

Give it room to breathe.

Minimum clear space

Keep a margin around the logo equal to the diameter of the illuminated mint node.

Recommended minimum size

Digital: 160 px wide
Print: 38 mm wide
Symbol: 24 px minimum

Clinical precision, human energy.

Recommended proportion

45% light surfaces · 30% navy · 15% blue · 10% mint

Sora leads. Manrope explains.

Sora

Headlines, figures, and key messages

Aa 01

Connections that illuminate

Manrope

Body copy, interface, and supporting content

Aa 01

Evidence becomes more useful when we can see it in context, connected to genes, symptoms, and communities.

Suggested hierarchy: title 40–56 · subtitle 24–32 · body 16–20 · label 11–13

Clear, rigorous, and hopeful.

CLEAR

Explains complex relationships without oversimplifying them.

RIGOROUS

Every connection preserves its source and context.

HUMAN

Speaks with respect; never reduces a person to their condition.

HOPEFUL

Invites people to explore possibilities without promising certainty.

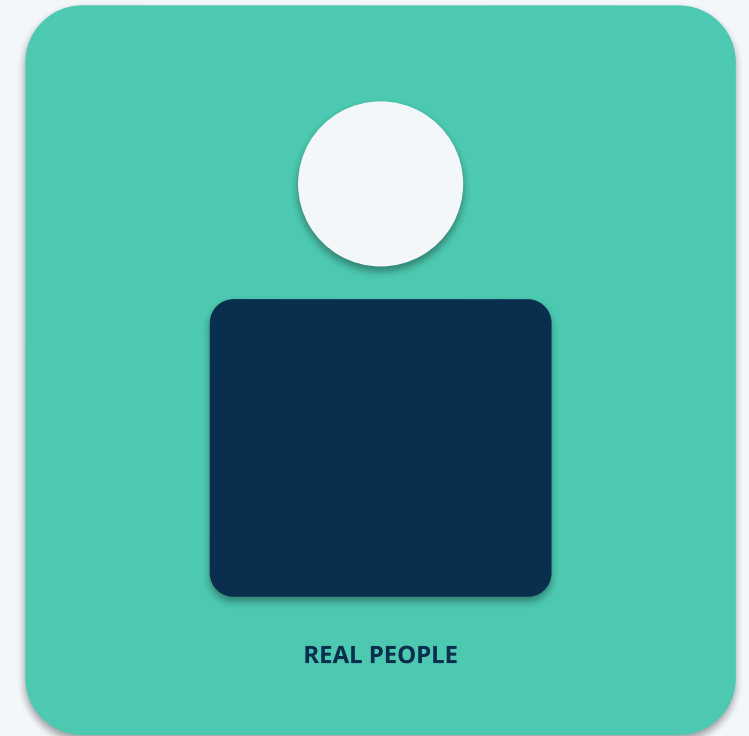

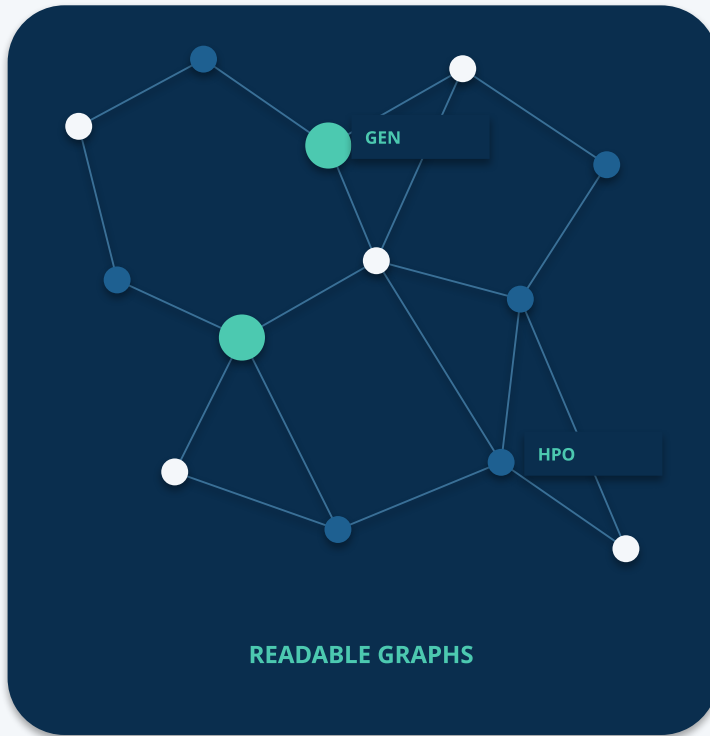

We say

“Explore the graph and follow the evidence.”

We avoid

“AI replaces medical evaluation.”

Data with context. People with dignity.

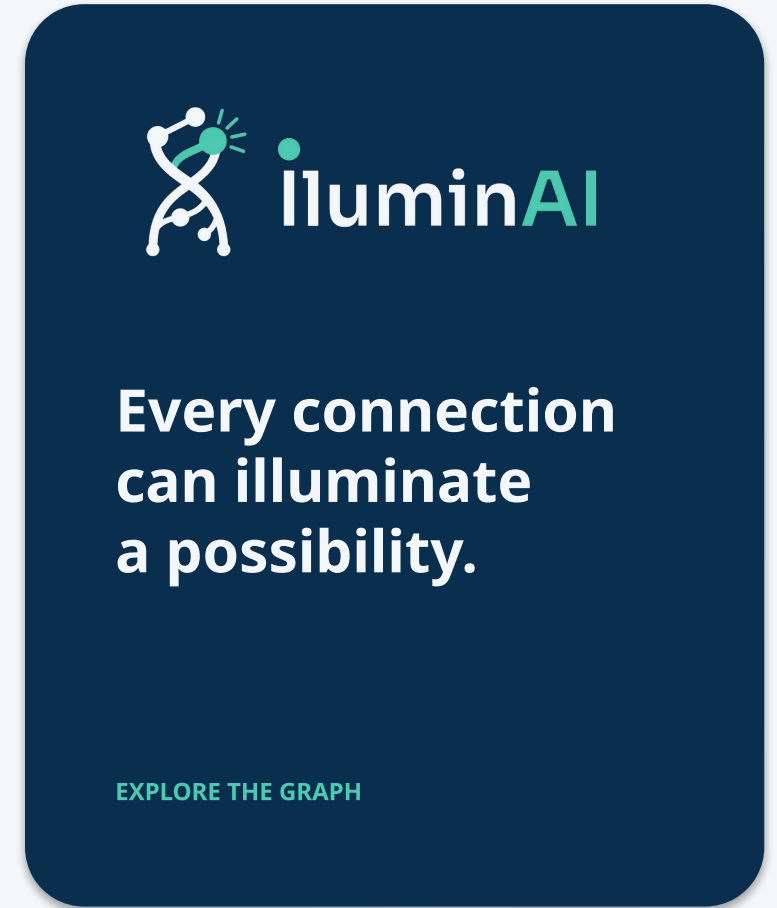

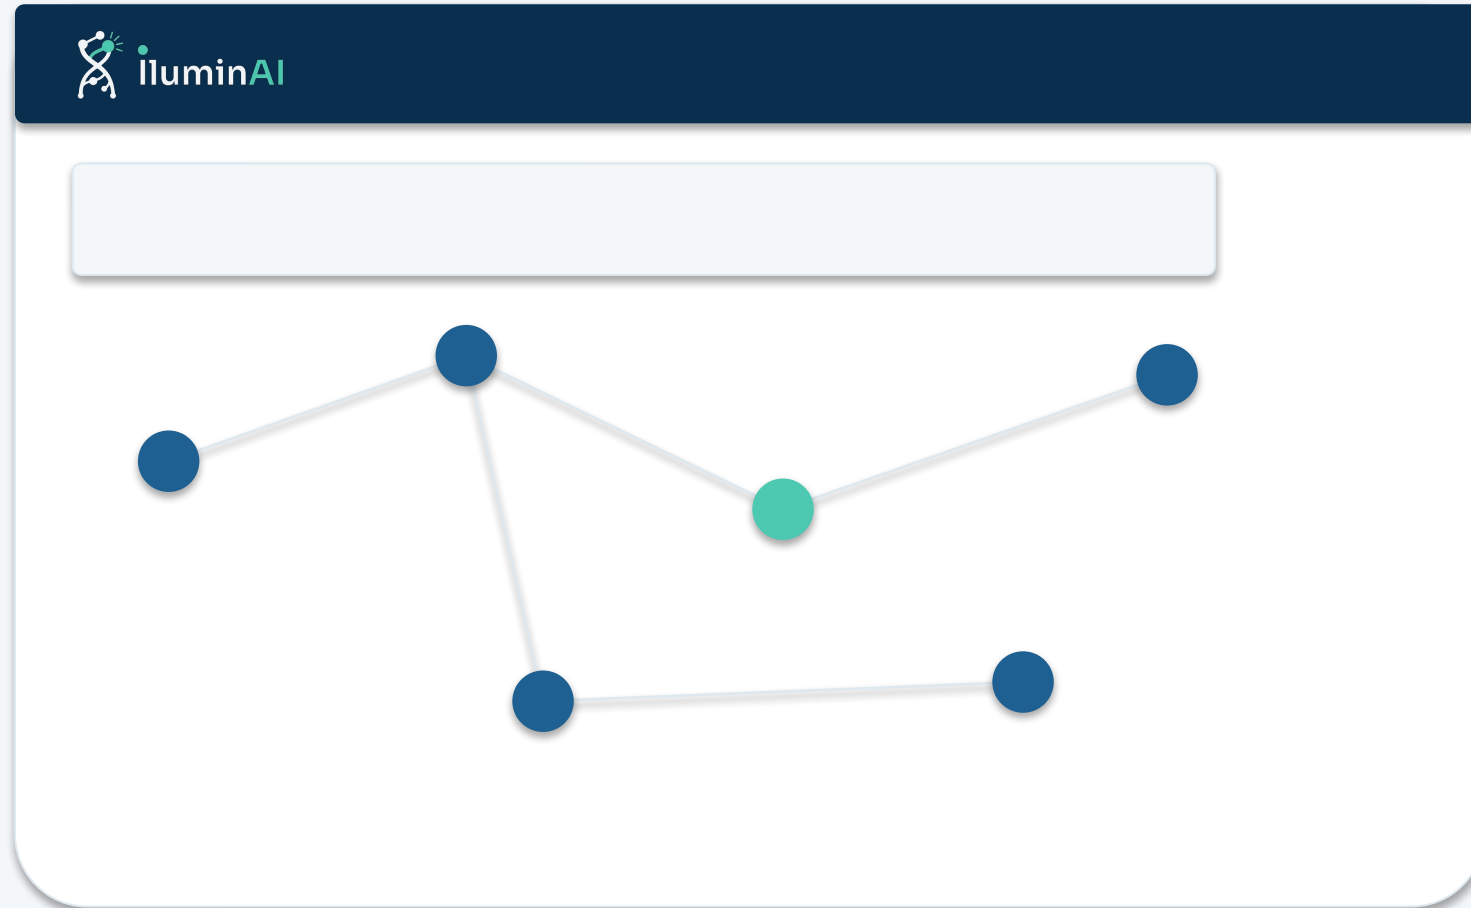

Prefer

simple diagrams, authentic research, collaborating hands, and bright clinical contexts.

Avoid

neon brains, humanoid robots, genetic clichés without context, and stereotyped patients.

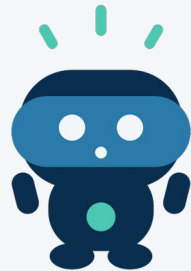

The brand should feel useful, not decorative.

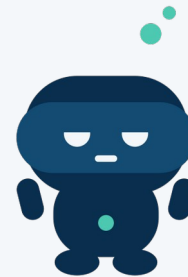

Ziva guides. It never diagnoses.

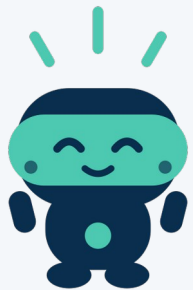

Calm

Listening

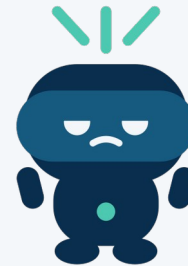

Thinking

Finds

Waves

Uncertain

Ziva

From Hebrew: radiance and life.

- Its screen shifts tone with each state; mint appears only when evidence is found.
- It explains and guides; it never reads test results or suggests treatments.
- Below 32 px, use the symbol instead of the mascot.
- It lives alongside the symbol: the illuminated DNA remains the formal mark.

Consistency before novelty.

YES

- Maintain the original proportions.
- Use official files and uniform backgrounds.
- Reserve mint for signals of discovery.
- Ensure contrast and legibility.

NO

- ✗ Distort, tilt, or rearrange the logo.
- ✗ Change colors or add gradients.
- ✗ Add shadows, outlines, or 3D effects.
- ✗ Present the platform as a substitute for a physician.

ILUMINAI

Traceable evidence. Equitable access. Professional validation.
